TRAININGS

Web Development By Angela U

udemy, Online

May 2023 - Present

I am doing a web development course on Udemy by Angela U. I have mastered HTML5, CSS and have a little knowledge of JavaScript. I have built my own portfolio to gain more knowledge and practical experience and hosted it through GitHub. The link to my portfolio has been provided in the other portfolio section.

PROJECTS

Cattle feeding management

Jun 2023 - Jun 2023

https://bineet2003.github.io/cattle-feedtime-management/

This project was built during ILLUMINA'23 hackathon. This is a basic web page for managing cattle data. It creates a new object with the retrieved values and adds it to an array. The array is stored in the browser's local storage using local Storage
